Exact Order – No Deviations (Service Node Experiment)
Voice Quote Engine (DONE today – catalog seeded + prompt live)
Booking → Job Object Creation (Supabase table + Edge Function webhook from voice agent)
SMS Notification System (Twilio – to customer & operator)
Internal APK Job Dashboard (Flutter – status + realtime GPS)
Payment Integration (Stripe – triggered after operator accepts)
Review Automation (post-job SMS only – “How did Help Assembly do today?”)
Each phase isolated. Revenue starts at Phase 1 + 2.
